MODERN
SALON

HOW-TO: Arctic/ Sky Blue, Silver Slate and Viridian Green Colormelt by PRAVANA

It's hard to take your eyes off of this one-of-a-kind colormelt by Pravana Guest Artist Maria Santana.

By using these three formulas below, you can create beautiful haircolor like this one, which showcases shades of arctic and sky blue, silver and slate, teal and touches of viridian green. Using PRAVANA ChromaSlik hair color, Santana's beautifully blended creation makes us think of the many shades of the ocean. It's a Trailblazing Color Innovation! Salons across the nation are making the switch to PRAVANA ChromaSilk. Why?

PRAVANA ChromaSilk is infused with hydrolyzed silk amino acids, acting as "color carriers" to deliver color deep into the hair's interior providing vibrant color. Natural keratin protein protects the hair during processing which gives hair shine. The protective protein system provides gray coverage for vibrant reds and shimmering copper tones. The low-ammonia formula allows all 95+ colors to perform as permanent or demi-permanent, by switching developers.

To get the look, follow the formulas below:

Formula 1: 6 parts ChromaSilk 7:11 1 part ChromaSilk Blue Ash Corrector

Formula 2: VIVIDS Silver

Formula 3: 3 parts PASTELS Blissful Blue: 1 part VIVIDS Silver
