SPRING HAIR MAKEOVERS THAT'LL BLOW YOUR MIND

GABRIELLE KORN, SENIOR DIGITAL EDITOR
“My winter hair color had been really warm—rich golden tones that got lighter in the front. When **Celebrity Stylist and PRAVANA Guest Artist Daniel Moon** of the Andy LeCompte Salon in West Hollywood suggested I switch from warm blonde to cool, it really spoke to me. ‘It seems counterintuitive, you go warmer for the warmer season, right!? Not always the case,’ he explained, noting that my skin tone (he described it as alabaster, which is a generous word for pasty) would work really well with a super-cool pink/blonde tone. He created that hue using PRAVANA’s Chromasilk hair color. We named it ‘Porcelain Blush.’ He ended up leaving the gold in the back, so there’s this really unique mixed metals effect—platinum/rose gold in front and true gold everywhere else. I feel like it brightens up my whole face!”
